Video presentation – Vincenza Palermo

Clinical cases

Starting from recommendations from Choosing Wisely Italy, some traces of cases were defined by professionals and elaborated by Zadig.

The five areas of recommendations considered most suitable for the purpose, also given their transversal nature, are the following:

1. Imaging tests (Alda Borré) – 5 cases
2. Laboratory tests (Romolo Dorizzi) – 5 cases
3. Medicines (Chiara Pavan) – 5 cases
4. Children (Sandra Trapani) – 5 cases
5. Elderly (Matteo Grezzana) – 5 cases
